CONTENTS

Research Papers

Measuring the hydraulic properties of a stable aggregated soil
K.R.J. Smettem and C. Kirkby (Glen Osmond, S.A., Australia) 1
The mechanism of evaporation from sand columns with restricted and unrestricted water tables using deuterium under turbulent airflow conditions
E. Shimojima, A.A. Curtis and J.V. Turner (Wembley, W.A., Australia). 15
Use of parameter transformations in nonlinear, discrete flood event models
B.C. Bates (Wembley, W.A., Australia) 55
The shape parameters of the geomorphologic unit hydrograph
P. Chutha (Nonthaburi, Thailand) and J.C.I. Dooge (Galway, Ireland) 81
On the origin of saline soils at Blackspring Ridge, Alberta, Canada
R. Stein (Edmonton, Alta., Canada) and F.W. Schwartz (Columbus, OH, U.S.A) 99
Pond seepage in two and three dimensions
G. Fipps (College Station, TX, U.S.A.) and R.W. Skaggs (Raleigh, NC, U.S.A.) 133
A generalized model of the required storage capacity
H. Hrelja and D. Isailovic (Sarajevo, Yugoslavia) 153
Factors controlling sediment discharge in the Mahanadi River Basin, India
G.J. Chakrapani and V. Subramanian (New Delhi, India) 169
Satellite data transmission and hydrological forecasting in the fight against onchocerciasis in west Africa
E. Servat, J.-M. Lapetite (Abidjan, Côte d'Ivoire), J.-C. Bader (Lomé, Togo) and J.-F. Boyer (Montpellier, France) 187
Parameter identification of solute transport models for unsaturated soils
R. Abeliuk and H.S. Wheater (London, U.K.) 199
Air permeability measurements of the unsaturated Bandelier Tuff near Los Alamos, New Mexico
P.M. Kearl, R.J. Zinkl, T. Cronk (Grand Junction, CO, U.S.A.) and J.J. Dexter (Albuquerque, NM, U.S.A.) 225
Global river runoff calculated from a global atmospheric general circulation model
G.L. Russell (New York, NY, U.S.A.) and J.R. Miller (New Brunswick, NJ, U.S.A.) . . 241
Hydraulics of interrill overland flow on a semi-arid hillslope, southern Arizona
A.J. Parsons (Keele, U.K.), A.D. Abrahams (Buffalo, NY, U.S.A.) and S.-H. Luk (Mississauga, Ont., Canada) 255
Computation of the instantaneous unit hydrograph and identifiable component flows with application to two small upland catchments
A.J. Jakeman (Canberra, A.C.T., Australia), I.G. Littlewood and P.G. Whitehead (Wallingford, U.K.) 275
Essais de mobilité des pesticides dans les sols agricoles
S. Dautrebande, M. Polarski et J. Dewalsche (Gembloux, Belgique) 301
Dynamics of turbidity currents measured in Katsurazawa Reservoir, Hokkaido, Japan
K. Chikita (Sapporo, Japan) and Y. Okumura (Neyagawa, Japan) 323
Definition of groundwater flow patterns by environmental tracers in the multiple aquifer system of southen Arava Valley, Israel
E. Rosenthal (Jerusalem, Israel), E. Adar, A.S. Issar (Sde Boqer, Israel) and O. Batelaan (Amsterdam, The Netherlands). 339

Short Note

A comparative evaluation of the estimators of the log Pearson type (LP) 3 distribution
D.V. Rao (Palatka, FL, U.S.A.) 369

Discussions
A comparative evaluation of the estimators of the log Pearson type (LP)3 distribution — Reply
K. Arora and V.P. Singh (Baton Rouge, LA, U.S.A.). 375
Three-component tracer model for stormflow on a small Appalechian forested catchment – Comment
D.P. Genereux and H.F. Hemond (Cambridge, MA, U.S.A.) 377
Tracer model for stormflow on a small Appalachian forested catchment — Reply
D.R. Dewalle, B.R. Swistock and W.E. Sharpe (University Park, PA, U.S.A.) 381

Book Reviews
Principles of Hydrology
J.S.G. McCulloch (Abingdon, U.K.) 385
Hydrology of Disasters
J.S.G. McCulloch (Abingdon, U.K.) 386
Evaporation in the Uplands
